-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I. Claims 1-13, drawn to an apparatus for receiving and compacting trash having a compacting mechanism, classified in class 100, subclass 214.
- Group II. Claims 14-15, drawn to an apparatus for receiving and compacting trash having a display panel, classified in class 206, subclass 459.5.
- Group III. Claims 16-17, drawn to a method of molding a display panel, classified in class 264, subclass 255.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, the invention of Group I discloses an apparatus having a compacting mechanism for compacting trash while the invention of Group II discloses an apparatus for receiving trash having a display panel for displaying an image. The apparatus of Group I does not require a display panel for its operation and the apparatus of Group II does not require a compacting mechanism for its operation.

Inventions of Group III and Groups (I and II) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different

modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case the different inventions, the invention of Group III discloses a method of molding a display panel, while the inventions of Groups I and II disclose apparatus for containing trash. Therefore, the apparatus of Groups I and II can not be used to practice the method as claimed in Group III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
